Evaluating Imagination Library of Colorado

Dr. Kristin Klopfenstein, Director Allie Kallmann Wegner, Staff Researcher

The Imagination Library of Colorado provides books to children birth to age 5 at no cost to families.

Over 19,000 books sent monthly to Colorado children

2005: first Colorado grantee

2021: statewide expansion

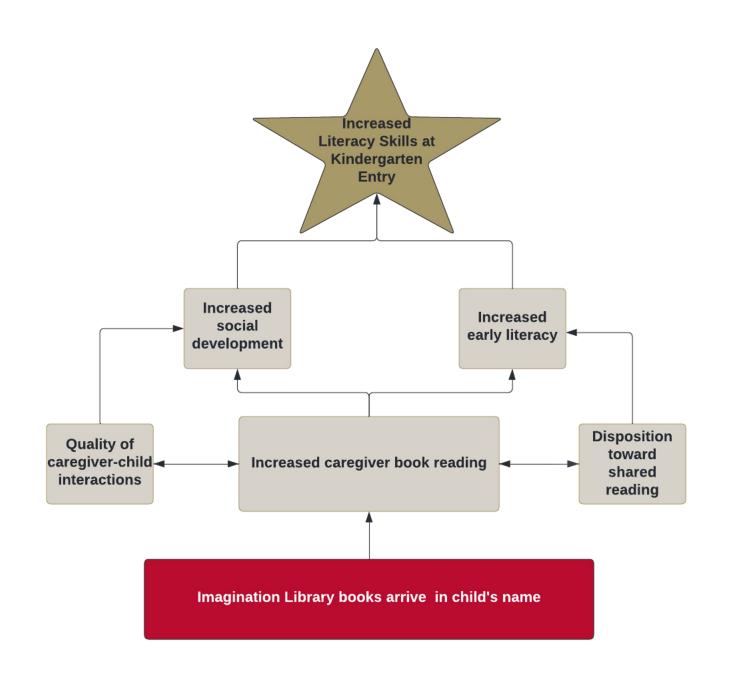

With more books in the home, children develop stronger early literacy skills.

Imagination Library and similar programs show evidence of:

- ↑ child attitudes toward reading
- ↑ home literacy environment
- † literacy skills: letter identification, phonological awareness
- ↑ language skills: expressive vocabulary, receptive vocabulary

Survey data across Colorado indicate parent satisfaction with the program

Research Question: What are the effects of Imagination Library of Colorado participation on children's literacy skills when they enter kindergarten?

Data from children entering K starting in 2018

Matches demographically similar children

Outcomes: Language, Literacy domains of TS GOLD and Acadience

Intentional focus on rural and urban districts

Linking Data Using LINC

Protection of data privacy

Single data request pathway and approval process

Large collaborative of data partners

Flexible partnership model

Top-tier identity resolution expertise

Compensation for time commitment

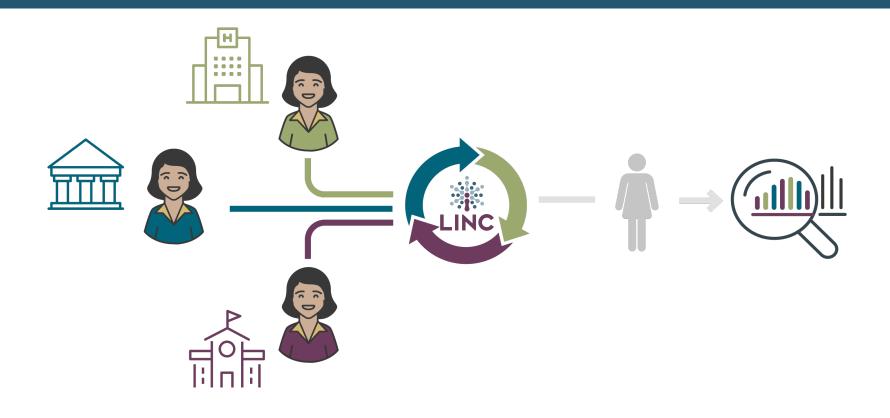

Background

- Co-developed through public-private partnership and launched in 2019
- Collaborative data sharing solution among state, local, and non-profit data partners - including Denver Public Schools
- Federated model with linking hub in Governor's Office of Information Technology (OIT)
- Fee for service paid by research team

Design and Data Flow

Activate data partnership

Link data and de-identify

Ensure ethical data use

Legal Framework

Enterprise Memorandum of Understanding (EMOU)

- Defines data partnership and LINC governance model
- Signed by OIT
- Joining data partners subsequently sign on

Data Sharing Agreement (DSA)

- Defines LINC data handling expectations
- Flexible by data owner
- Signed once by participating data partners and OIT

Data Use License (DUL)

- Standard terms for end user of de-identified project data
- Populated with approved project information
- Signed by end user

Next Steps and Timeline

Next Steps:

- Identify others in your district who should be involved in LINC onboarding and data management
- Participate in a follow-up conversation with Whitney for a detailed overview of a LINC project from start to finish
- Sign EMOU and finalize DSA to complete LINC onboarding
- Review and approve LINC project request

Target Timeline:

- LINC onboarding and project approval = June
- Sharing first round of data = August
